

Closing a person who is not date-specific or whose date of closing is not in the future.

Enter "C" in 13G and the last date of eligibility in 13E. The person will be removed from the turn-around IMU5 and the person will show a closed status.

"S" persons who are sanctioned on a Temporary Assistance case

Date specificity does not apply to the following level of care, because this level of care does not include Medicaid (Title XIX) coverage.

"L" Community spouse or dependent or institutionalized persons (level of care N, I, D, or K). May be used only on a vendor case.

Fields 13E and 13G should normally be considered as one field. When one field has a change, the other field should also be changed.

The level of care is changed by entering the correct code in the updated area.

This field should never be zeroed out.

Highlighted error: This is a one character alpha field and the Entry must be one of the valid codes from the code sheet.
