Authorizing School Age Children in FAMIS

During the school year, school age children should have a limited need for full time day units of care. Child care for school age children is limited to half and/or part time day units of care from October 1 through April 30.

Authorizing five (5) full time day units of care, per month, should cover possible school absences, school holidays, snow days, teacher's meetings, and any other days school may not be in session.

If there are more than five (5) days school is not in session during the designated months, the child care provider should utilize the Child Care Provider Payment Resolution Request (CD-147) for payment consideration of the additional units of care provided.
