

# Practice Alert

This Practice Alert is to remind staff that children needing child care must be under age 13, or age 13 to 18 and needing care due to a special need. A child may be classified with having a special need as a valid need for child care when there is no other traditional need for care in the household. A certified physician, psychologist, psychiatrist, licensed clinical social worker, licensed professional counselor, nurse practitioner, or physician's assistant must provide an annual statement verifying the special need for child care.
