

Practice Points

CONCLUDING REFERRALS

This Practice Point is to notify staff of changes to the conclusion screen for referrals including Preventive Service Referrals, Non-Caretaker Referrals, and Newborn Crisis Assessments.

On the conclusion screen, edits have been removed requiring completion of the Participant Characteristics screen including Parent/Substitute Relationships and Child Relationships. These fields are no longer required to close a referral. For Newborn Crisis Assessments, you will continue to be required to complete Possible Infant Drug Exposure Levels and Possible Mother of Drug Exposed Infant Exposure Levels for all victim and non-victim children listed on the report.
