

Practice Alert

Termination of Parental Rights Referral Form

The purpose of this Practice Alert is to inform team members that a new version of the TPR referral form (CD-274) has been posted to e-forms. The new form can be found [here](#).

This update to the TPR referral form is the direct result of feedback from field staff, court partners, and from the CQI process. This form has been simplified to focus on providing the core information attorneys need to file a termination of parental rights petition. A separate referral form should be filled out for each parent involved in the petition. Follow up conversations should be held between the referring team member and the attorney filing the TPR action to ensure that the referral information is clear and to answer any additional questions.

Please discontinue use of the previous referral form and begin using the current version from this date forward.
