Immunizations

Dear Children's Division Staff,

At this time there is no regulation in place to enforce the requirement of immunizations as outlined in the Model Licensing Standards provided via memo CD-19-41. Until that regulation is promulgated, resource homes are to be told the Division is committed to safety of our children and we are working to promulgate the regulations consistent with the standard. As a result, families who are being licensed should be advised that when and if a regulation is successfully promulgated, compliance with all regulatory requirements will be required at the time their license is due for renewal.
